TPC Express Benchmark™ HS (TPCx-HS)

Full Disclosure Report

for

Cisco UCS Integrated Infrastructure for Big Data and Analytics

(with 17 UCS C240M5 Servers)

using

Cloudera Enterprise Edition V5.13.0

and

Red Hat Enterprise Linux Server Release 7.4

First Edition

January 30, 2018

Cisco Systems, Inc. (Cisco), the Sponsor of this benchmark test, believes that the information in this document is accurate as of the publication date. The information in this document is subject to change without notice. The Sponsor assumes no responsibility for any errors that may appear in this document.

The pricing information in this document is believed to accurately reflect the current prices as of the publication date. However, the Sponsor provides no warranty of the pricing information in this document.

Benchmark results are highly dependent upon workload, specific application requirements, and system design and implementation. Relative system performance will vary as a result of these and other factors. Therefore, the TPC_{Express} Benchmark™ HS should not be used as a substitute for a specific customer application benchmark when critical capacity planning and/or product evaluation decisions are contemplated.

All performance data contained in this report was obtained in a rigorously controlled environment. Results obtained in other operating environments may vary significantly. No warranty of system performance or price/performance is expressed or implied in this report.

Cisco and the Cisco Logo are trademarks of Cisco Systems, Inc. and/or its affiliates in the U.S. and other countries. A listing of Cisco's trademarks can be found at www.cisco.com/go/trademarks. Third party trademarks mentioned are the property of their respective owners. The use of the word partner does not imply a partnership relationship between Cisco and any other company.

TPC Benchmark™, TPCx-HS and HSph, are registered certification marks of the Transaction Processing Performance Council.

The Cisco products, services or features identified in this document may not yet be available or may not be available in all areas and may be subject to change without notice. Consult your local Cisco business contact for information on the products or services available in your area. You can find additional information via Cisco's web site at www.cisco.com. Actual performance and environmental costs of Cisco products will vary depending on individual customer configurations and conditions.

Pricing: 1 = Cisco, 2 = CDW ⁽¹⁾ All discounts are based on US list prices and for similar quantities and configurations. The discounts are based on the overall specific components pricing from respective vendors in this single quotation. Discounts for similarly sized configurations will be similar to those quoted here, but may vary based on the components in the configuration. <p style="text-align: center;">Audited by Doug Johnson of InfoSizing</p>	<table style="width: 100%;"> <tr> <td>Three-Year Cost of Ownership</td> <td>\$656,096</td> </tr> <tr> <td>HSph@1TB</td> <td>8.76</td> </tr> <tr> <td>\$/HSph@1TB</td> <td>\$74,896.47</td> </tr> </table>	Three-Year Cost of Ownership	\$656,096	HSph@1TB	8.76	\$/HSph@1TB	\$74,896.47
Three-Year Cost of Ownership	\$656,096						
HSph@1TB	8.76						
\$/HSph@1TB	\$74,896.47						

Prices used in TPC benchmarks reflect the actual prices a customer would pay for a one-time purchase of the stated components. Individually negotiated discounts are not permitted. Special prices based on assumptions about past or future purchases are not permitted. All discounts reflect standard pricing policies for the listed components. For complete details, see the pricing sections of the TPC benchmark specifications. If you find that the stated prices are not available according to these terms, please inform at pricing@tpc.org. Thank you.

Abstract

This document contains the methodology and results of the TPC Express Benchmark™ HS (TPCx-HS) test conducted in conformance with the requirements of the TPCx-HS Standard Specification, Revision v2.0.2.

The test was conducted at a Scale Factor of 1 with 17 UCS C240M5 Servers running Cloudera Enterprise Edition V5.13.0 on Red Hat Enterprise Linux Server Release 7.4.

Measured Configuration

Company Name	Cluster Node	Virtualization	Operating System

Preface

TPC Express Benchmark™ HS Overview

TPC Express Benchmark™ HS (TPCx-HS) was developed to provide an objective measure of hardware, operating system and commercial Apache Hadoop File System API compatible software distributions, and to provide the industry with verifiable performance, price-performance and availability metrics. The benchmark models a continuous system availability of 24 hours a day, 7 days a week.

Even though the modeled application is simple, the results are highly relevant to hardware and software dealing with Big Data systems in general. The TPCx-HS stresses both hardware and software including Hadoop run-time, Hadoop File-system API compatible systems and MapReduce layers. This workload can be used to assess a broad range of system topologies and implementation of Hadoop clusters. The TPCx-HS can be used to assess a broad range of system topologies and implementation methodologies in a technically rigorous and directly comparable and vendor-neutral manner.

The TPCx-HS kit is available from the TPC (See www.tpc.org/tpcx-hs for more information). Users must sign-up and agree to the TPCx-HS User Licensing Agreement (ULA) to download the kit. Re-distribution of the kit is prohibited. All related work (such as collaterals, papers, derivatives) must acknowledge the TPC and include TPCx-HS copyright. The TPCx-H Kit includes: TPCx-HS Specification document, TPCx-HS Users Guide documentation, shell scripts to set up the benchmark environment and Java code to execute the benchmark load.

The purpose of TPC benchmarks is to provide relevant, objective performance data to industry users. To achieve that purpose, TPC benchmark specifications require that benchmark tests be implemented with systems, products, technologies and pricing that:

- *Are generally available to users;*
- *Are relevant to the market segment that the individual TPC benchmark models or represents (e.g., TPCx-HS models and represents Hadoop run-time and Hadoop File-system API compatible systems);*
- *Would plausibly be implemented by a significant number of users in the market segment the benchmark models or represents.*

The use of new systems, products, technologies (hardware or software) and pricing is encouraged so long as they meet the requirements above. Specifically prohibited are benchmark systems, products, technologies or pricing (hereafter referred to as "implementations") whose primary purpose is performance optimization of TPC benchmark results without any corresponding applicability to real-world applications and environments. In other words, all "benchmark special" implementations that improve benchmark results but not real-world performance or pricing, are prohibited.

The rules for pricing are included in the TPC Pricing Specification and rules for energy measurement are included in the TPC Energy Specification.

Further information is available at www.tpc.org

Clause 1: General Items

1.1 Test Sponsor

A statement identifying the benchmark sponsor(s) and other participating companies must be provided.

This benchmark was sponsored by Cisco Systems, Inc.

1.2 Parameter Settings

Settings must be provided for all customer-tunable parameters and options which have been changed from the defaults found in actual products, including by not limited to:

- *Configuration parameters and options for server, storage, network and other hardware component incorporated into the pricing structure;*
- *Configuration parameters and options for operating system and file system component incorporated into the pricing structure;*
- *Configuration parameters and options for any other software component incorporated into the pricing structure;*
- *Compiler optimization options.*

Comment 1: In the event that some parameters and options are set multiple times, it must be easily discernible by an interested reader when the parameter or option was modified and what new value it received each time.

Comment 2: This requirement can be satisfied by providing a full list of all parameters and options, as long as all those that have been modified from their default values have been clearly identified and these parameters and options are only set once.

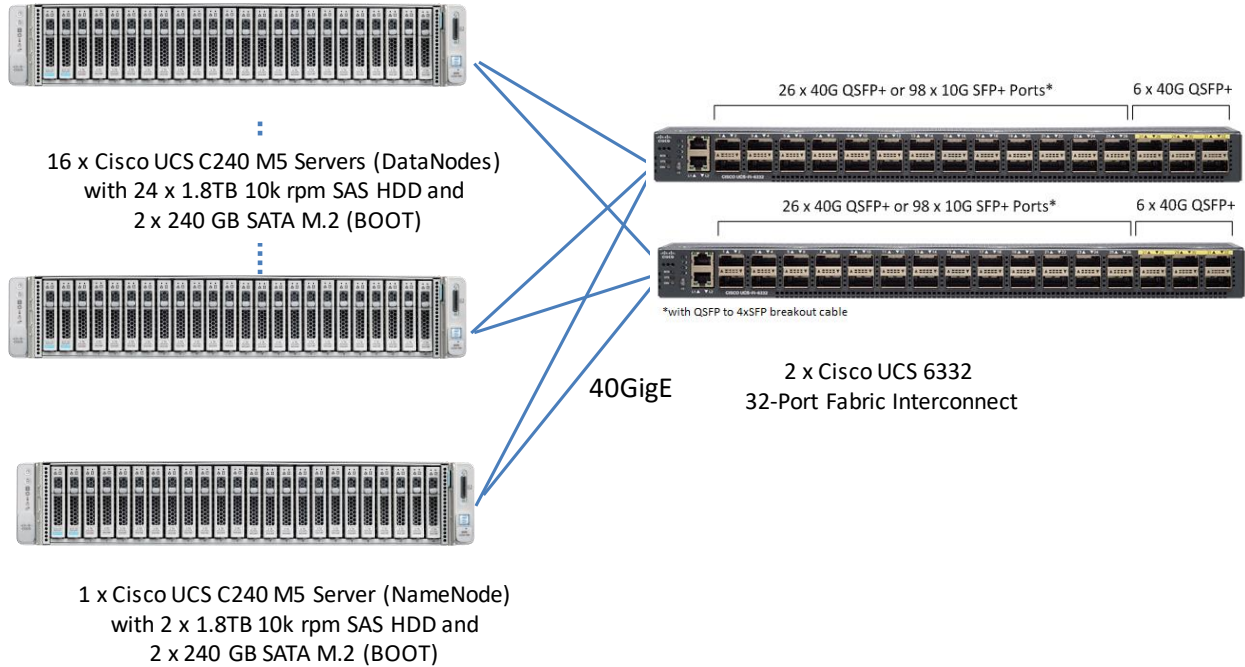

The supporting files contain the parameters and options used to configure the components involved in this benchmark.

1.3 Configuration Diagrams

7.4.4 Diagrams of both measured and priced configurations must be provided, accompanied by a description of the differences. This includes, but is not limited to:

- *Total number of nodes used;*
- *Total number and type of processors used/total number of cores used/total number of threads used (including sizes of L2 and L3 caches);*
- *Size of allocated memory, and any specific mapping/partitioning of memory unique to the test;*
- *Number and type of disk units (and controllers, if applicable);*
- *Number of channels or bus connections to disk units, including their protocol type;*
- *Number of LAN (e.g., Ethernet) connections and speed for switches and other hardware components physically used in the test or are incorporated into the pricing structure;*
- *Type and the run-time execution location of software components.*

Measured Configuration

The measured configuration consisted of:

- Total Nodes: 17
- Total Processors/Cores/Threads: 34/476/952
- Total Memory: 3.19TB
- Total Number of Storage Drives/Devices: 420
- Total Storage Capacity: 702.96TB

Server nodes details:

- 17 x UCS C240M5 Servers, each with:
 - Processors/Cores/Threads: 2/28 /56
 - Processor Model: 2 x Intel® Xeon® Gold Processor 6132, 2.60 GHz, 19.25 MB L3
 - Memory: 192GB
 - Controller: 1 x Cisco 12G SAS Modular Raid Controller
 - Drives:
 - 24 x 1.8TB 10K RPM SAS HDD (data nodes)
 - 2 x 1.8TB 10K RPM SAS HDD (name node)
 - 2 x 240 GB SATA (all nodes, boot disk)
 - Network: 1 x Cisco VIC 1387 Dual Port 40Gb QSFP CNA MLOM

Network connectivity detail:

- 2 x Cisco UCS 6332 32-Port Fabric Interconnect

The distribution of software components over server nodes is detailed in section 1.5.

Priced Configuration

There are no differences between the priced and measured configurations.

1.4 Dataset Distribution

The distribution of dataset across all media must be explicitly described.

Table 1.4 describes the distribution of the dataset across all media in the system.

Table 1.4: Dataset Distribution

Server Node	Controller	Disk Drive	Description of Content
1	Cisco 12G Modular RAID controller with 4GB cache	1-2 (HDD)	Data, Temp
1	Embedded RAID PCH SATA	0 (2 SSD, RAID-1)	Operating system, Root, Swap, Hadoop Master
2-17	Cisco 12G Modular RAID controller with 4GB cache	1-24 (HDD)	Data, Temp
2-17	Embedded RAID PCH SATA	0 (2 SSD, RAID-1)	Operating system, Root, Swap, Hadoop Master

1.5 Software Components Distribution

The distribution of various software components across the system must be explicitly described.

Table 1.5 describes the distribution of the software components across the system.

Table 1.5: Software Component Distribution

Node	Map/Reduce		HDFS		ZooKeeper
	Resource Manager	Node Manager	NameNode	DataNode	QuorumPeer
1	X		X		X
2-3		X		X	X
4-17		X		X	

Distributed file system implementation and corresponding Hadoop File System API version must be disclosed.

Cloudera Enterprise Edition V5.13.0 (fully HDFS compatible at the API level).

Map/Reduce implementation and corresponding version must be disclosed.

Cloudera Enterprise Edition V5.13.0 (compatible equivalent to Hadoop 2.6.0).

Clause 2: Workload Related Items

2.1 Hardware & Software Tunable

Script or text used to set for all hardware and software tunable parameters must be reported.

The Supporting File Archive contains all configuration scripts.

2.2 Run Report

The run report generated by TPCx-HS benchmark kit must be reported.

The Supporting File Archive contains the full run report. Following are extracts from the run report that lists the performance summary for both runs.

Run Report for Run 1 – Performance Run

```
=====
TPCx-HS Performance Metric (HSph@SF) Report

Test Run 1 Details      Total Time =                411
                        Total Size =            10000000000
                        Scale-Factor =                1

TPCx-HS Performance Metric (HSph@SF):                8.7642

=====
```

Run Report for Run 2 – Repeatability Run

```
=====
TPCx-HS Performance Metric (HSph@SF) Report

Test Run 2 Details      Total Time =                409
                        Total Size =            10000000000
                        Scale-Factor =                1

TPCx-HS Performance Metric (HSph@SF):                8.8028

=====
```

2.3 Benchmark Kit Identification

Version number of TPCx-HS kit and checksum for HSGen, HSSort and HSValidate Programs must be reported.

```
Kit Version                2.0.2

File                       MD5
BigData_cluster_validate_suite.sh  58c13ddb98a2d1228f2df10f4a087a71
HSDataCheck.sh              a621d8a94db9c6015f3463557664ef21
TPCx-HS-master.jar         492cbc51a1a60c28b43d96c79d08683d
TPCx-HS-master.sh         b110d48eab67e21fd88822beb376b1d3
```

2.4 Benchmark Kit changes

No modifications were made to the TPC-provided kit.

Clause 3: SUT Related Items

3.1 Data Storage Ratio

The data storage ratio must be disclosed.

Table 3.1 describes the details of the storage devices configured on the system and their capacity.

Table 3.1: Storage Device Capacity

Qty	Capacity (GB)	Total (GB)
386	1,800	694,800
34	240	8,160
Total Storage (TB)		702.96

Scale Factor = 1

Data Storage Ratio = (Storage / SF) = **702.96**

3.2 Memory Ratio

The Scale Factor to memory ratio must be disclosed.

Total Configured Memory = 3.19TB

Scale Factor to Memory Ratio = (SF / Memory) = **0.31**

Clause 4: Scale Factors and Metrics

4.1 HSGen Time

The HSGen time must be disclosed for Run1 and Run2.

	Run1	Run2
HSGen	91.407	89.496

4.2 HSSort Time

The HSSort time must be disclosed for Run1 and Run2.

	Run1	Run2
HSSort	271.340	271.251

4.3 HSValidate Time

The HSValidate time must be disclosed for Run1 and Run2.

	Run1	Run2
HSValidate	43.457	43.356

4.4 HSDataCheck Times

Both HSDataCheck times must be disclosed for Run1 and Run2.

	Run1	Run2
HSDataCheck (pre-Sort)	3.000	2.000
HSDataCheck (post-Sort)	3.000	3.000

4.5 Performance & Price-Performance

The performance metric (HSph@SF) must be disclosed for Run1 and Run2. Price-performance metric (\$/HSph@SF) must be disclosed for the performance run.

	Run1	Run2
HSph@1TB	8.76	8.80

\$/HSph@1TB	74,896.47 USD
-------------	---------------

Auditors' Information and Attestation Letter

The auditor's agency name, address, phone number, and Attestation letter must be included in the full disclosure report. A statement should be included specifying who to contact in order to obtain further information regarding the audit process.

This benchmark was audited by Doug Johnson, InfoSizing.

January 30, 2018

I verified the TPC Express Benchmark™ HS v2.0.2 performance of the following configuration:

Platform: Cisco UCS Integrated Infrastructure for Big Data and Analytics
(with 17 UCS C240M5 Servers)
Operating System: Red Hat Enterprise Linux Server 7.4
Apache Hadoop Cloudera Enterprise Edition V5.13.0
Compatible Software:

The results were:

Performance Metric 8.76 HSph@1TB
Run Elapsed Time 411.00 Seconds

Cluster	17 UCS C240M5 Servers, each node with:		
CPU	2 x Intel Xeon Gold Processor 6132 (2.60 GHz, 14-core, 19.25 MB L3)		
Memory	192 GB		
Storage	Qty	Size	Type
	24	1.8TB	10K RPM SAS HDD (Data Nodes)
	2	1.8TB	10K RPM SAS HDD (Name Node)
	2	240GB	SATA (All Nodes, boot disk)

In my opinion, these performance results were produced in compliance with the TPC requirements for the benchmark.

The following verification items were given special attention:

- All TPC-provided components were verified to be v2.0.2
- No modifications were made to any of the Java code
- Any and all modifications to shell scripts were reviewed for compliance
- All checksums were validated for compliance
- The generated dataset was properly scaled to 1TB
- The generated dataset and the sorted dataset were replicated 3-ways

- The elapsed times for all phases and runs were correctly measured and reported
- The Storage and Memory Ratios were correctly calculated and reported
- The system pricing was verified for major components and maintenance
- The major pages from the FDR were verified for accuracy

Additional Audit Notes:

None.

Respectfully Yours,

A handwritten signature in black ink that reads "Doug Johnson". The signature is written in a cursive style with a long horizontal flourish extending to the right.
